DocEngine

Document Automation – LegalTech Swiss Made

FAST AND EFFICIENT

DocEngine is a web-based dashboard from which documents and contracts can be created automatically and managed centrally. This enables maintaining the company's internal know-how. Create better documents in half the time by strategically making the workflow more efficient.

› **Document Automation** – Work efficiently with intelligently automated and modularly structured documents and contracts.

› **Contract Management** – Easy control and management of internal processes thanks to digital contract management.

› **Media disruption-free transmission to authorities** – Direct transmission of automated documents and contracts to various authorities.

DocEngine offers lawyers, notaries, tax advisors and legal consultants an advanced, flexible and mobile working environment with maximum data security.
